**THE ROOF OF THE WORLD ROADTRIP**  
**23<sup>RD</sup> AUG TO 1<sup>ST</sup> SEPT. 2026**

# ABOUT PAMIR HIGHWAY THE ROOF OF THE WORLD

The Pamir Highway, officially known as the M41, is one of the most breathtaking and remote roads in the world, traversing the rugged landscapes of Central Asia. Stretching over 1,250 kilometers (776 miles), the highway cuts through the Pamir Mountains, connecting Dushanbe, Tajikistan, to Osh, Kyrgyzstan. This legendary route, often referred to as the "Roof of the World," is a dream for adventure travelers, overlanders, and motorcyclists seeking a journey through some of the most spectacular and untouched landscapes on the planet.

The origins of the Pamir Highway date back centuries, as it was part of the ancient Silk Road, a vital trade route linking East and West. The modern road, however, was built during the Soviet era in the 1930s to facilitate military and trade movements in this remote region. Despite its historical importance, the highway remains largely undeveloped, with rough, unpaved sections and high-altitude passes that challenge even the most seasoned travelers.

# ABOUT BEYOND XPEDITIONS
